

## **We're ready to look for a consultant...**

### **Latest from our recent Zoom meeting**

At a meeting on 13 October 2020, a draft Consultant Brief was reviewed and updated including proposed project timescales, project management arrangements, and the tendering and selection process.

When the document has been edited accordingly, we'll post a link to it.

Watch this space.

### **Why do we need a consultant?**

It's basically the next step as outlined under the Locality guidelines, which you can read in full, [here](#).

Our draft policy documents have evolved to reflect the full range of issues and concerns raised by the people of Ware in response to our online survey earlier this year – and we've been working to translate these aspirations and goals into crystal-clear and workable proposals.

A consultant will draft a formal Neighbourhood Plan in appropriate "Planner Speak" ready for consideration by the planning authorities.

We're still aiming to have our Plan adopted in early 2022.

Thank you for your continued support – and we'd love to hear your views, whether via social media or directly via [this site](#)...
